Facility View Interactive

OPTIMISE THE USE of your meeting and conference rooms

Facility View is more than just a manifestation of quality and design. It is also a unique example of how electronic booking of meeting and conference rooms, auditoriums and the like can be united with the physical signage in and around the rooms so as to provide users with a fully updated overview on site.

Facility View and Facility View Interactive enable companies to make much more efficient use of their

meeting room facilities, for instance by helping to eliminate the problem of double booking. Moreover, the systems ensure that on entering a meeting or conference venue, participants can immediately check that they are in the right room, and the chairman of the meeting can make sure that the room has been booked for the relevant period.

Facility View Interactive with top panel

Facility View

Facility View is linked to the company's MS Outlook setup. When a meeting room is booked in the system, the booking will automatically appear on the screen. If a meeting is currently being held in the room, this will be displayed in the top half of the screen, while any up and coming meetings will be listed in the bottom half (up to three meetings).

The colour of the horizontal line that crosses the centre of the screen indicates whether the room is vacant (green) or occupied (red).

Facility View Interactive

In addition to featuring the connection to MS Outlook, the interactive version of Facility View makes it possible to set up, extend or conclude reservations directly on the screen by means of the user-friendly touch menu on the right-hand side. For example, if a meeting is running on, the person hosting the meeting can immediately see whether it is possible to extend the booking of the room – and if it is, can automatically do so on site. Similarly, a couple of simple touches are all that are needed to conclude the booking if a meeting ends ahead of schedule.

Changes made on the sign itself will instantly update the company's MS Outlook setup. This means that the system can be kept fully up-to-date both physically and electronically at all times.

Quality

The exterior cabinet of the Facility View models is made of aluminium and glass, demonstrating quality of the highest order. Behind the glass front panel is a 10.4" LCD screen that has the capability of running all day long. The screen is used in "portrait" position.

The Facility View Interactive system has a touch screen, with touch fields fitted and indicated on the interior side of the glass thereby reducing wear and tear, as well as ensuring the screen remains in good condition.

Top panel

Facility View can also be supplied with an aluminium top panel, which can be painted in the customer's choice of colour and can, for example, feature the room name or number. In addition, it is possible to use the top panel to identify the room in Braille.

Facility View can also be recessed into the wall as standard.

Display

The background colour of the screen can be changed to suit specific requirements – for example to the company's logo colours. The text colour of the meeting information and menus can also be altered if required.

Facility View Interactive - green allows you to book or extend meeting - red means occupied

Anyone can produce a sign

Do not think of Modulex as simply a sign manufacturer. At the end of the day, our products are first and foremost a means rather than an end in themselves.

Rather, think of us as leading experts in Wayfinding and Information Management. As a partner whose deep insight into user behaviour enables us to create efficient sign strategies for complex environments.

In other words, choosing Modulex means choosing more than just signs with a unique design and unrivalled quality. It means choosing solutions.

Leading the way since 1963

Modulex is one of the leading suppliers of Wayfinding and Information Management in the form of architectural sign solutions. The company was founded in 1963 as part of the LEGO Group, and we operate today in more than 35 countries. Thanks to our global presence, we have the capacity to deliver sign solutions that ensure brand consistency across continents. At the same time, we have a finely tuned logistical setup and extensive project experience which ensure that we can complete even the most complex delivery without problems – and on time.
