## ADD CHARACTER to your indoor signs

Infinity Blazon highlights the innovation that has distinguished Modulex for more than 40 years.

We have expanded our popular Infinity Basic series, which combines a solid expression and high-quality materials at favourable prices. The innovation in Infinity Blazon lies in the shape itself. For this range, our designers have drawn inspiration from classic coats of arms with their gently curved sides.

The results speak for themselves. A family of signs that seamlessly matches both formal and more creative environments. And an expression that both blends in – and stands out.

## Shapes

Infinity Blazon consists of a broad range of individual panels in various sizes. The panels are available for wall and projecting mounted, for suspension and as floor and table signs. In addition, many of the panels can be supplied as Paperflex models, making it possible to change the information displayed in the blink of an eye.

## Materials

The Infinity Blazon panels are made of 3 mm thick aluminium of the highest quality. If signs are to feature Braille or raised lettering, the panels are supplied in 3 mm phenol.

Every sign is accompanied by a 12 mm black foam plate in the same dimensions as the panel. This plate makes it simple to install the sign using the clips supplied, and, at the same time, it can be positioned between the wall and the panel to create an exciting visual effect. Alternatively, the foam plate can be omitted from the installation for a "floating" effect.

## Colours

Panels are available in 128 different standard colours or more than 3,000 special colours.

## Text and graphics

The Infinity Blazon places no limits on creativity. The solutions available include vinyl, digital print and print on panel. For print on panel, we use a resolution of no less than 1,480 dpi which means that it is possible to print even the finest details in impressive quality. This is particularly noticeable in the full-coverage effect surfaces – such as "carbon fibre" and "leather" which are created by Modulex' designers and can be supplied on request. In fact, the print on panel technique makes it possible to transform the signs into veritable works of art.

### Anyone can produce a sign

Do not think of Modulex as simply a sign manufacturer. At the end of the day, our products are first and foremost a means rather than an end in themselves.

Rather, think of us as leading experts in Wayfinding and Information Management. As a partner whose deep insight into user behaviour enables us to create efficient sign strategies for complex environments.

In other words, choosing Modulex means choosing more than just signs with a unique design and unrivalled quality. It means choosing solutions.

### Leading the way since 1963

Modulex is one of the leading suppliers of Wayfinding and Information Management in the form of architectural sign solutions. The company was founded in 1963 as part of the LEGO Group, and we operate today in more than 35 countries. Thanks to our global presence, we have the capacity to deliver sign solutions that ensure brand consistency across continents. At the same time, we have a finely tuned logistical setup and extensive project experience which ensure that we can complete even the most complex delivery without problems – and on time.
