## Modulex - **Macer Interior**

A completely new way to unite wayfinding, design and functionality

The Macer Interior product line is an innovative concept. Our designers wanted to create a type of sign that allowed them maximum freedom in their choice of materials, combined with the opportunity to give free rein over creativity both today and in the long term.

Due to it's remarkable flexibility, the sign system opens the door to a host of combination options – even involving the outdoor Macer range.

## Shapes

Macer Interior is available in five versions that can be mixed and matched without diminishing the distinctive design profile.
On all versions, it is possible to supplement tactile information in the form of raised lettering or Braille.

The heart of the sign is the newly designed panel holder, with its distinctive edge angled in towards the panel itself.

## Materials

Macer Interior panels are made of 3 mm thick aluminium of the highest quality. If signs are to feature Braille or raised lettering, the panels are supplied in 3 mm phenol.

The holder consists of two painted aluminium profiles that gently apply pressure to the panel by means of the countersunk screws on the underside. The internally fitted rubber profiles ensure that the panel is held securely in place.

On post and panel signs we use a 19 mm light sandwich construction in painted aluminium and with a black aluminium profile on all four edges.

## Colors

Panels are available in 128 different standard colours and more than 3,000 special colours at no extra cost. For all Tactile signs, panel colors are gloss 15 matt, all paperflex glass are matt and all fittings are MX17 dark grey.

## Text and graphics

Macer gives designers the freedom to create any style of sign they want, from bold and innovative to simple and elegant.
The flexibility means that Macer signs can be used in any environment. The solutions available includes vinyl, digital print, print on panel and tactile. All text on the Tactile signs are raised, and if requested, braille may be applied.

## Warranty

We provide a 2-year production warranty on all parts.

## Environment

With a very few exceptions, all parts are made at our factory in Denmark and are therefore subject to some of the most stringent environmental requirements in the world. Moreover, in recent years we have received recognition and numerous awards for our ongoing work to minimise environmental impact and create a green, climate-friendly company.

## Quality

Modulex has been awarded the ISO 9001 standard.
